1988 I, No. 1—6

Recent Aspects of Fourier Transform Spectroscopy, Vol. 2

Proceedings of the 6th International Conference on Fourier Transform Spectroscopy, Vienna, August 24—28, 1987

G. Guelachvili, R. Kellner, G. Zerbi (eds.)

Problem Solving, General Areas

Fourier Transform Spectroscopy of Surface Polariton Bragg Reflection in Gratings. *K. O. Boltar, V. A. Fedirko* (A 1.02) 7

FT-IR Analysis of Chemical Warfare Agents. *E. H. Braue, Jr., M. G. Pannella* (A 1.03) 11

The Application of Diffuse and Specular Reflectance to TLC-FTIR and Other Microsampling Applications. *S. G. Bush, A. J. Breaux* (A 1.04) 17

Practical Uses of FTIR Spectroscopy in Wood Science and Technology. *O. Faix* (A 1.08) 21

Characterization of Citrus and Kiwi Flavors and Their Degradation Processes by Combination of GC/FTIR and GC/MS. *G. Fischböck, W. Pfannhauser, R. Kellner* (A 1.09) 27

On-Line FT-MIR/NIR Process Analysis. *M. P. Fuller, M. E. Meyers* (A 1.10) 31

Identification of Acetylenes in the Output from a Jet-Stirred Combustor by Gas Chromatography-Mass Spectrometry and Gas Chromatography-Fourier Transform Infrared Spectrometry. *A. L. Lafleur, J. J. Gagel, J. P. Longwell, P. A. Monchamp* (A 1.11) . . 35

A Critical Comparison of Solid Sample Preparation Techniques in Infrared Spectroscopy. *M. Hauser, J. Oelichmann* (A 1.12) 39

Analysis of Renal Stones by FTIR Spectroscopy. *C. Paluszkiewicz, J. Ściesiński, M. Gałka* (A 1.13) 45

Industrial Problem Solving Using Infrared Photoacoustic Spectroscopy. *P. B. Roush, J. Oelichmann* (A 1.14) 49

Preparation and FT-IR Spectra of Calcium Bilirubinate. *J.-F. Wang, Y.-Z. Lin, R. D. Soloway, J.-G. Wu, G.-X. Xu* (A 1.16) 53

Data Treatment, Chemometrics, Expert Systems, Quantitative FTS, NIRS

An Improvement of Low Frequency Spectroscopic Techniques Applying Fourier Transform Processes. *Y. Balcou* (A 2.02) 57

The Application of Fourier-Transformed Near-Infrared Spectra to Quantitative Analysis by Comparison of Similarity Indices (CARNAC). *A. M. C. Davies, H. V. Britcher, J. G. Franklin, S. M. Ring, A. Grant, W. F. McClure* (A 2.04) 61

A New Method for Interferogram Correction in FTS. *S.-F. Fan, X.-C. Xu* (A 2.05) 65

Resolution Enhancement for Infrared Rotatory Dispersion Spectra of Induced Cholesteric Phases. *H. M. Heise, D. Kolev* (A 2.07) 73

Intensity Measurements in the Visible and UV as an Aid to Spectral Analysis. *R. C. M. Learner, A. P. Thorne* (A 2.11) 79

Application of the Linear Prediction *z*-Transform and Autoregression to FTIR Spectral Analysis. *Y.-P. Lee, D.-S. Chen* (A 2.12) 85

Application of Infrared Spectral Searching and Data Bases to Compound Identification. *S. R. Lowry, D. M. Dalrymple, R. J. Rosenthal* (A 2.14) 89

Fourier Self-Deconvolution in the Analysis of Near-Infrared Spectra of Chemically Complex Samples. *W. F. McClure, A. M. C. Davies* (A 2.15) 93

Modified Phase Correction Algorithms in VCD/FT-IR Spectrometry. *C. A. McCoy, J. A. de Haseth* (A 2.16) 97

Two-Dimensional Infrared (2D IR) Spectroscopy. A New Tool for Interpreting Infrared Spectra. *I. Noda, A. E. Dowrey, C. Marcott* (A 2.18) 101

Sample/Spectrum Relationships for Resolution Enhancement in Near Infrared Reflectance Spectrometry. *J. M. Olinger, P. R. Griffiths* (A 2.19) 105

Two-Dimensional Searching of Unknowns Using GC Retention Index Data and Vapor Phase IR Data. *R. H. Shaps, M. Boruta, A. Varano* (A 2.22) 109

A Window Fourier Domain Search System. *J. W. Sherman, J. A. de Haseth* (A 2.23) 113

Near Infrared Reflectance Spectroscopy (NIRS): A Method of Rational Multicomponent Analysis. *H. W. Siesler* (A 2.24) 117

Incorporation of FT-IR Spectral Data in a Computer-Assisted Prediction of Globular Protein Structure. *E. V. Tripodi, J. A. de Haseth* (A 2.25) 121

Spectroscopic Intensities as Measures of Order Parameter Close to Order-Disorder Transitions. *H. Yurtseven, W. F. Sherman* (A 2.26) . 125

Improvement and Application of Two Extrapolation Methods to FT-IR Data. *A. M. Zoubir, D. J. Gingras, J. F. Böhme* (A 2.27) 129

Special Sampling (IRRAS, Microscopy, High Pressure, TGA-FTIR)

Applications of FT-IR/Microscopy in Forensic Analysis. *J. P. Beauchaine, J. W. Peterman, R. J. Rosenthal* (A 3.02) 133

FT-IR Analysis of Single Human Normal and Leukemic Lymphocytes. *E. Benedetti, P. Vergamini, G. Spremolla* (A 3.03) 139

Microsampling for Infrared Spectroscopy—A Comparison of Different Techniques for HPLC- and TLC-Fractions. *U. Bode, H. M. Heise* (A 3.04) 143

Fourier Transform Infrared Reflection-Absorption Spectroscopy of Amino Acids Adsorbed on Metal Surfaces. *C. Carlsson, B. Liedberg* (A 3.05) 149

An Infra-Red Reflectance Microscope—A Useful Analytical Accessory. *C. A. Gilchrist, I. Jones, F. J. Bergin* (A 3.07) 153

Combined System and Its Application of Thermogravimetric Analysis/FT-IR. *K. Ichimura, H. Ohta, T. Tajima, T. Okino* (A 3.08) 157

Pushing the Limits of Quantitative FTIR-Microscopy. *R. Kellner, C. Weigel* (A 3.09) 163

High Pressure FT-IR Spectra of Aqueous Systems: Applications to Biomembranes. *H. H. Mantsch, P. T. T. Wong, D. J. Siminovitch* (A 3.10) 167

Infrared Spectra of the Polymorphs of Naphthazarin: Microscopy and Low Temperature Studies. *S. O. Paul, C. J. H. Schutte* (A 3.14) . . . 171

Accurate Reflectance Measurements in the Infrared Spectral Range Using an Integrating Sphere. *W. Richter* (A 3.17) 175

TGA/FT-IR: Thermogravimetric Analysis with Fourier Transform Infrared Detection of Evolved Gases. *R. C. Wieboldt, S. R. Lowry, R. J. Rosenthal* (A 3.18) 179

Micro-FTIR Measurements on Individual Interplanetary Dust Particles. *B. Wopenka, P. D. Swan* (A 3.19) 183

The FTIR Study of Uranium Oxides by the Method of Light Pipe Reflection Spectroscopy. *B.-Z. Yu, W. N. Hansen* (A 3.20) 189

Cooled Samples, Matrix Isolation

FT-IR Spectra of Proteins at Low Temperatures. *H. L. Casal, U. Köhler, H. H. Mantsch, J. L. R. Arrondo* (A 4.02) 195

Matrix Isolation FTIR Studies on the Hydrogen Bonding Sites in Uracil Derivatives. *M. Graindourze, G. Maes, T. Zeegers-Huyskens* (A 4.03) 199

Theoretical—Part 1

An FT-IR Demonstration of the Occurrence of Satellite Bands in the Spectra of Hydrogen Bonds in Crystals. *M. Falk* (A 5.02) 203

Refractive Index and Derived Molecular Properties of Some Gases Determined by Dispersive Fourier Transform Spectroscopy (DFTS) in the Visible Wave Number Range. *K. Kerl, H. Häusler* (A 5.04) 207

Simulation of Dispersive Fourier Interferograms of Gases in the Visible Wave Number Range. *K. Kerl, U. Hohm* (A 5.05) 211

Fourier Transform Infrared Spectroscopy as a Tool for the Study of Rare Earths Carbohydrates Complexes. *H. Liang, H. Guo, D.-F. Xu, J.-G. Wu* (A 5.06) 215

FT-IR Studies on the Bonding Mode of NCS Groups in Some New Thiocyanate Complexes. *Y.-Z. Lin, J.-G. Wu, G.-X. Xu* (A 5.07) . . . 219

Structural Information from Detailed Analysis of Infrared Absorption Bands. *B. Lutz, J. H. van der Maas* (A 5.08) 223

Pure Rotational Spectrum of PH_3 in the 10—100 cm^{-1} Range: Collisional Broadening Coefficients by H_2 and He. *M. Sergent-Rozey, Nguyen-Van-Thanh, I. Rossi, N. Lacome, G. Tarrago, A. Lévy* (A 5.10) 227

Structural Information and Vibrational Assignments from Solvent-Induced Frequency Shifts. *T. Visser, P. Blom, J. H. van der Maas* (A 5.11) 231

FT-IR Study and Normal Vibration Analysis of Rare Earth Oxalates. *X.-Z. Wang, J.-G. Wu, T.-Z. Jin, N. Shi, G.-X. Xu* (A 5.12) 235

Research on the Apodizing Functions for FTS. *S.-F. Fan, X.-C. Xu* (A 5.13) 239

Dynamic FTS

Simultaneous Rapid-Scan Infrared Spectroscopy and Temperature Profiling During Fast Thermal Decomposition Reactions. *T. B. Brill, J. T. Cronin, T. P. Russell* (A 6.01) 243

FTIR Spectra (Frequency and Intensity) of Poly-(Para-Phenylenes). *C. Castiglioni, M. Gussoni, J. T. Lopez Navarrete, G. Zerbi* (A 6.02) . 247

Preliminary FTIR Study of Swelling of Oriented Polyamide 11 Samples. *M. Dosière* (A 6.03) 251

Investigation of Intramolecular Processes in Proteins by Time Resolved FTIR-Difference Spectroscopy. *K. Gerwert, B. Hess* (A 6.04) 255

In-Situ FT-IR Studies on Cyclic Voltammetry of Polythiophene. *A. Ivaska, M. Koponen, P. Passiniemi, J.-E. Österholm* (A 6.05) . . . 259

In-Situ FTIR Spectro-Electrochemistry of Polyaniline. *H. Neugebauer, N. S. Sariciftci, H. Kuzmany, A. Neckel* (A 6.09) 265

In Situ FTIR Spectroscopy of Iron Electrodes. *H. Neugebauer, W. Tschinkel, G. Nauer, A. Neckel* (A 6.10) 269

Application of Fourier Transform Infrared Rapid Scan Techniques to Photochemical Investigations. *R. J. Rosenthal* (A 6.11) 273

Temperature-Jump FT-IR Time-Resolved Spectrometry. *D. C. Sherman, J. A. de Haseth* (A 6.12) 277

Polymers

FTIR-ATR Characterization of a New Biomaterial Capable to Adsorb High Quantity of Heparin. *R. Barbucci, M. Nocentini* (A 7.01) 279

Fourier-Transform Infrared Study of Segmental Orientation in Polymer Blends. *P. Chabot, M. Pézolet, R. E. Prud'homme* (A 7.02) . 283

Application of a Resolution Enhancement Technique to the FTIR Characterisation of Propylene/Ethylene Copolymers. *J. M. Chalmers, A. Bunn, H. A. Willis, C. Thorne, R. Spragg* (A 7.03) 287

Nondestructive Determination of Crystallinity by Diffuse Reflectance FT-IR in Composites Made from Polyphenylene Sulphide and Carbon Fibres. *K. C. Cole, D. Noël, J.-J. Hechler, D. Wilson* (A 7.04) 291

FTIR Spectra and Structure of New Polystyrenes: Syndiotactic Polystyrene and Poly-Para-Methyl-Styrene. *G. Conti, E. Santoro, L. Resconi, G. Zerbi* (A 7.05) 297

Pyrolysis-Evolved Gas-FTIR Analysis of Polyurethanes. *R. G. Davidson* (A 7.06) 301

Fourier Transform Infrared Studies of Alternate Acid-Amine Langmuir-Blodgett Films with Pyroelectric Properties. *G. H. Davies, J. Yarwood* (A 7.07) 305

Measurement of Transmission Properties of Optical Fibers for Telecommunications by FT-IR Spectroscopy. *W. F. X. Frank, W. Goertz* (A 7.08) 309

The Preliminary Study of Hydration of Polyuridylic Acid (Poly-U) by FT-IR. *H. Guo, B.-Z. Yu, H.-Z. Liu, J.-G. Wu, G.-X. Xu* (A 7.10) . . . 315

Diffuse Reflectance Fourier Transform Infrared Studies of the Reinforcement/Coupling Agent Interface of Composites. *H. W. Siesler* (A 7.12) 319

Dynamic Fourier Transform Infrared Spectroscopy in Polymer Research. *H. W. Siesler, W. Perl* (A 7.13) 323

FT-IR Studies of Thermal History Effects on Molecular Structure of Epoxy Resin Systems. *L. V. Vladimirov, E. F. Oleinik* (A 7.14) 329

Biological Samples

Instrumental Barriers in Biological Fourier Transform Infrared Spectroscopy. *J. O. Alben, A. A. Croteau, F. G. Fiamingo, C. F. Hemann, V. A. Molleran, S. Park, K. A. Powell* (A 8.01) 335

Mammalian Cell Growth Studied *In Situ* by Fourier Transform Infrared Spectroscopy. *T. B. Hutson, M. J. W. Chang, J. T. Keller, D. J. Long* (A 8.05) 339

Conformational Changes of Protein Adsorbed on Polyurethane Studied by FTIR-ATR Spectroscopy. *M. Nocentini, R. M. Gendreau, K. K. Chittur* (A 8.06) 343

In Situ FT-IR Studies of Langmuir-Blodgett Monolayers. *M. L. Mitchell, R. A. Dluhy* (A 8.07) 349

Fourier Interferometric Stimulation (FIS) in Biology and Medicine. *R. Gemperlein* (A 8.08) 353

Influence of Water on the Infrared Spectra of Mucin. *F. Liu, J.-G. Wu, R. D. Soloway, H. Guo, D. K. Martini, N. Xu, G.-X. Xu* (A 8.12) . . . 357

The Preliminary Study of Hydration of Phosphocholine by FT-IR. *H.-Z. Liu, J.-G. Wu, H. Guo, X.-S. Zhou, G.-X. Xu* (A 8.13) 361

Fourier Transform Infrared Study on the Hydration of Polycytidylic Acid (Poly C). *H.-Z. Liu, B.-Z. Yu, H. Guo, J.-G. Wu, G.-X. Xu* (A 8.14) 365

FTIR-ATR Characterization of Langmuir-Blodgett Assemblies of 1-Palmitoyl-2-Pyrenedecanoylphosphatidylcholine and Dipalmitoylphosphatidylcholine. *T. I. Lotta, J. A. Virtanen, P. K. J. Kinnunen* (A 8.15) 369

The Differentiation and Identification of Pathogenic Bacteria Using FT-IR and Multivariate Statistical Analysis. *D. Naumann, V. Fijala, H. Labischinski* (A 8.16) 373

Fourier Transform Infrared Spectroscopy (FT-IR) and X-Ray Diffraction—Tools for Probing Lipopolysaccharide and Lipid A Membranes from Gram-Negative Bacteria. *D. Naumann, C. Schultz, J. Born, F. Rogge, H. Labischinski* (A 8.17) 379

An FT-IR Study of Sarcoplasmic Reticulum Solubilization by Triton X-100. *J. L. R. Arrondo, A. Muga, A. Prado, F. M. Goñi* (A 8.18) . . . 385

Temperature Dependences on the Infrared Spectra of Some Proteins. *M. Tasumi, T. Yamamoto* (A 8.19) 389

A New Multi-Sample ATR-Accessory for the Analysis of Very Similar Complex Biological and Technical Materials. *B. von Maltzan, D. Naumann* (A 8.21) 393

Semiconductors

Infrared Study of Iron Impurities in Polycrystalline Solar Grade Silicon. *A. Borghesi, M. Geddo, A. Stella* (A 9.03) 397

ATR-FTIR Experiments with Chlorosilanes. *H. Bürgy, G. Calzaferri, I. Kamber* (A 9.04) 401

Intrinsic Defects in Irradiated and Annealed GaAs Detected by FTIR. *J. D. Collins, G. A. Gledhill, R. C. Newman* (A 9.05) 405

High Resolution FTIR Measurements of LVM-Structure in GaAs. *G. A. Gledhill, R. C. Newman, J. D. Collins* (A 9.06) 411

High Sensitivity Detection of Trace Impurities in the Presence of Other Impurity Species: The Shallow Thermal Donors in Cz-Silicon. *J. A. Griffin, H. Navarro, W. C. Clark, L. Genzel* (A 9.10) . . 415

Difference FTIR Spectroscopy of Folded Phonons in $Si/Si_{1-x}Ge_x$ Superlattices. *H. Krenn, F. Buxbaum* (A 9.11) 419

Optical Damping Constants in Narrow Gap Semiconductors. *K. Kumazaki, N. Nishiguchi* (A 9.12) 423

Far Infrared Reflection Spectra of Layered Semiconductors. *K. Kumazaki, N. Nishiguchi, K. Imai* (A 9.13) 427

FT-IR-ATR Observation of SiOH and SiH in the Oxide Layer on an Si Wafer. *Y. Nagasawa, H. Ishida, F. Soeda, A. Ishitani, I. Yoshii, K. Yamamoto* (A 9.14) 431

Double Modulation Fourier Transformed Infrared Photoluminescence of InSb. *N. L. Rowell, H. Buijs* (A 9.16) 435

Band Distortions and Inversions in FTIR Spectra of Silicon Dioxide on Silicon. *Y.-S. Yen, J. S. Wong* (A 9.17) 441

FT-IR Spectroscopy of Magneto-Optical Oscillations in $Hg_{1-x}Cd_xTe$ Photodiodes. *M. Zvára, P. Hlídek* (A 9.18) 445
